

UNDER CURRENT[®] SOLO PRO

SINGLE MODULE WATER CULTURE SYSTEM

Current Culture H2O would like to thank you for purchasing a UC SOLO PRO Water Culture System. Follow these simple instructions and you will be growing trees in no time!

PARTS

CCH20 PRO
GROWTH MODULE

CCH20 PRO LID
WITH PORT HOLE COVERS

CCH20 NET POT(S)

DRAIN VALVE KIT

AIR HOSE AND
AIR PUMP ADAPTER

AQUA-PORE PRO XL
AIR DIFFUSER

AIR PUMP

CULTURED SOLUTIONS
& GROWSTONE

ASSEMBLY INSTRUCTIONS

1. Unpack and identify all components.
2. Install DRAIN VALVE KIT in PRO GROWTH MODULE base. Install UNISEAL first then DRAIN VALVE fitting. **Make sure valve is closed!**
3. Install AQUA-PORE PRO XL AIR DIFFUSER at base of PRO GROWTH MODULE with included suction cups. Moisten suction cups and press firmly to achieve a good seal.
4. Insert AIR HOSE into quick-connect fitting on AQUA-PORE PRO XL AIR DIFFUSER. Connect opposite end of AIR HOSE to quick connect fitting on AIR PUMP ADAPTER.
5. Unpack AIR PUMP and position above water level (use pump box as stand), attached AIR PUMP ADAPTER to AIR PUMP outlet. Use included click clamp to seal.
6. Attach PRO LID to PRO GROWTH MODULE. Run AIR HOSE up and out air inlet cove in PRO LID.
7. Install PORT HOLE COVERS in PRO LID.
8. Install NET POTS in PRO LID.

GROWING INSTRUCTIONS

1. Fill PRO GROWTH MODULE with purified water just above DRAIN VALVE, check for leaks. Continue filling to 30 gallon mark.
2. Plug in AIR PUMP.
3. Add included CULTURED SOLUTIONS VEG A/B to PRO GROWTH MODULE at recommended dilution. Adjust pH to 5.8 - 6.2.
4. Transplant rooted cutting/seedling onto planting deck in CCH20 NET POTS, fill NET POTS with GROWSTONE (rinse GROWSTONE thoroughly before use) to rim.
5. Install CCH20 NET POTS with plants into PRO LID.
